

A long, long time ago...

it rained for many days and nights

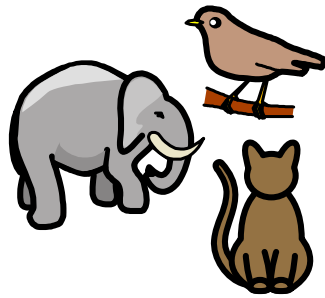

because of of the rain, the oceans and

rivers started growing bigger, covering the earth

with water

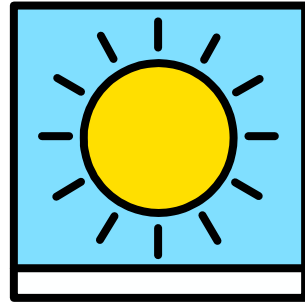

animals were in danger

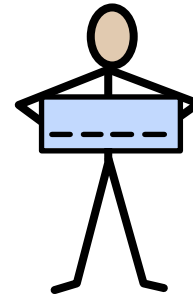

because of the water

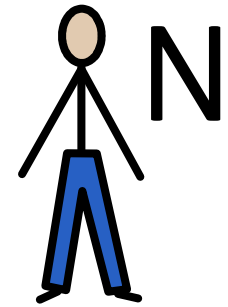

1

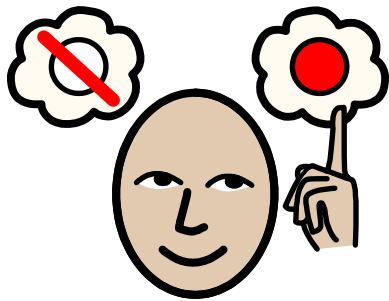

one day,

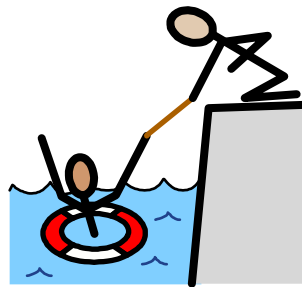

a man called

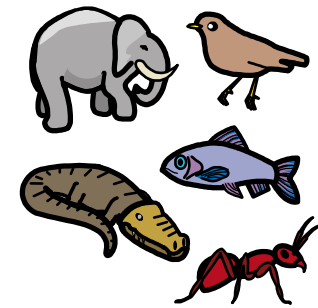

Noah

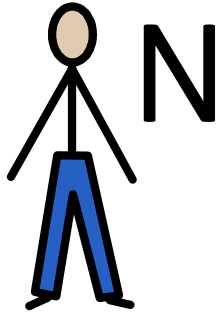

decided to

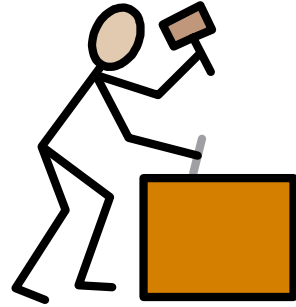

save

all the animals

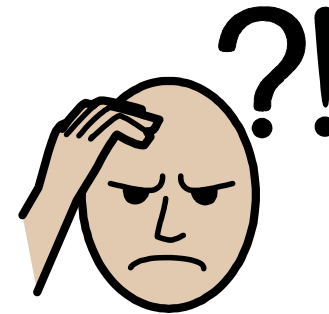

Noah

worked

very

hard

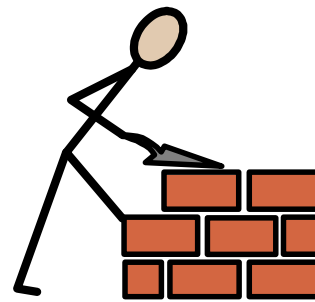

with

his

family

to

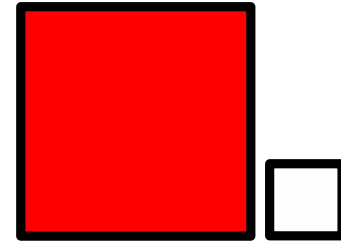

build

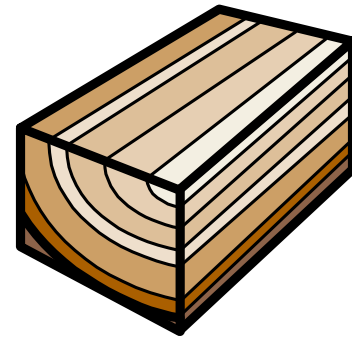

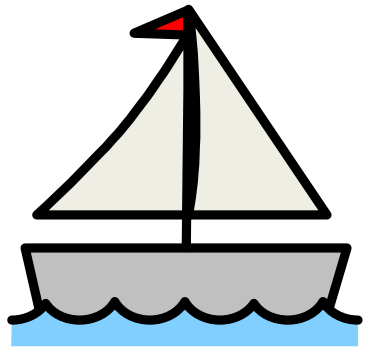

an

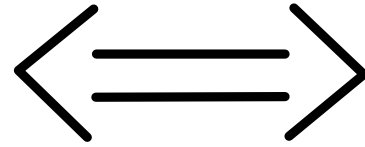

ark

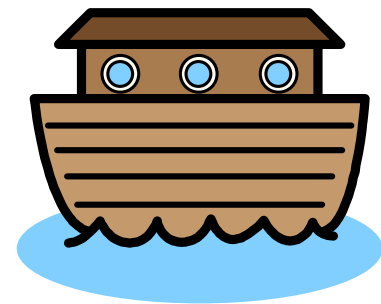

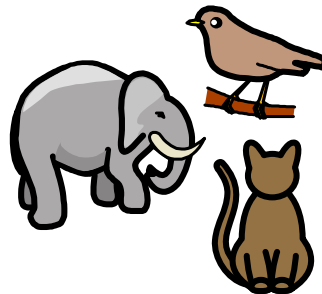

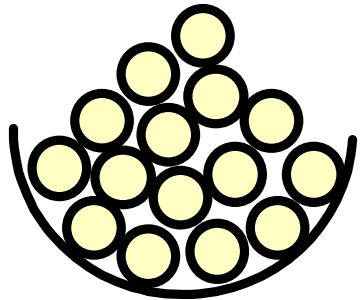

an ark is a big

boat made of wood

Noah's ark was big enough to

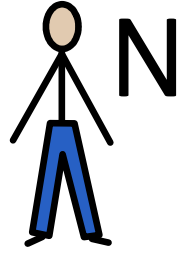

fit

many

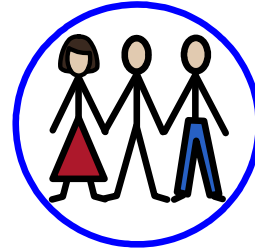

animals

inside

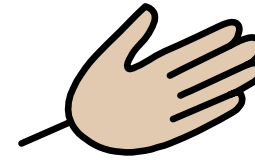

Noah

and his

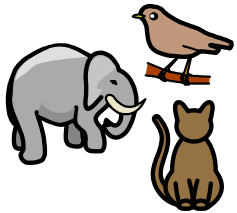

family

helped

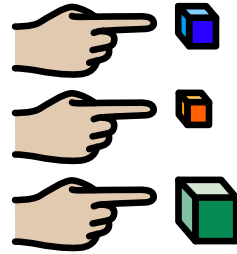

2

two

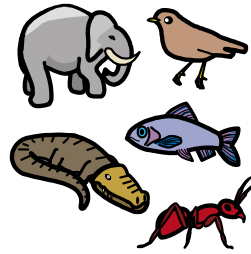

animals

of

each

family

to go

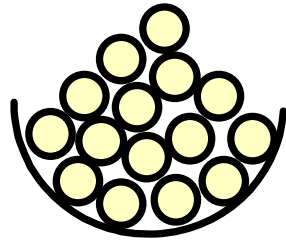

in the ark

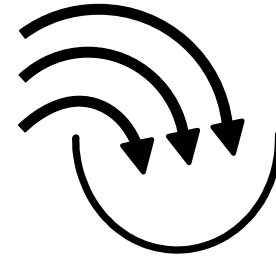

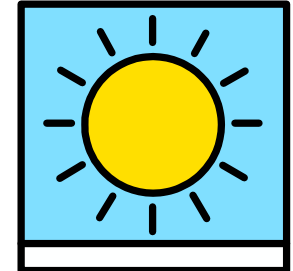

it rained

for many

more

days

and nights,

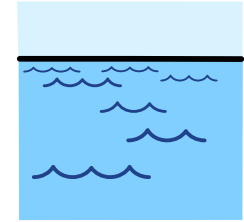

the earth

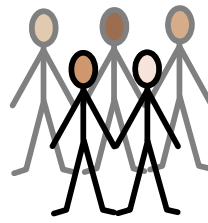

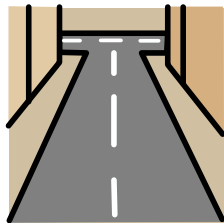

was flooded

=

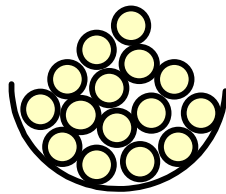

a flood means there is lots of water covering

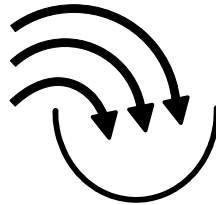

the streets, people cannot walk and

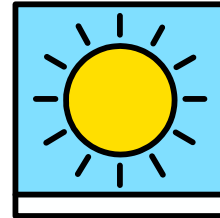

cars cannot drive

many

more

days,

rain

after

the

stopped

flood

gone,

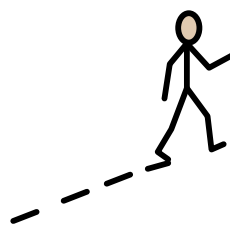

it was

and the

was

safe

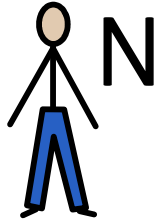

leave

ark

to

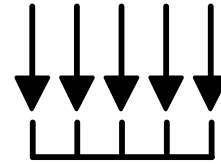

the

Noah,

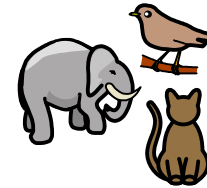

his family,

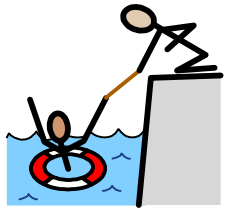

and

all

animals were

saved,

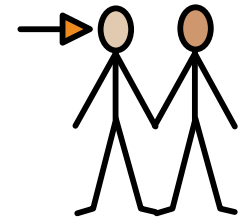

the water

was

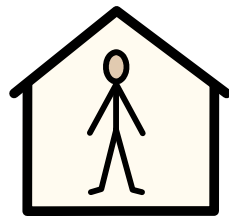

gone

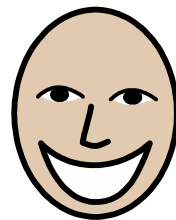

and

they

lived

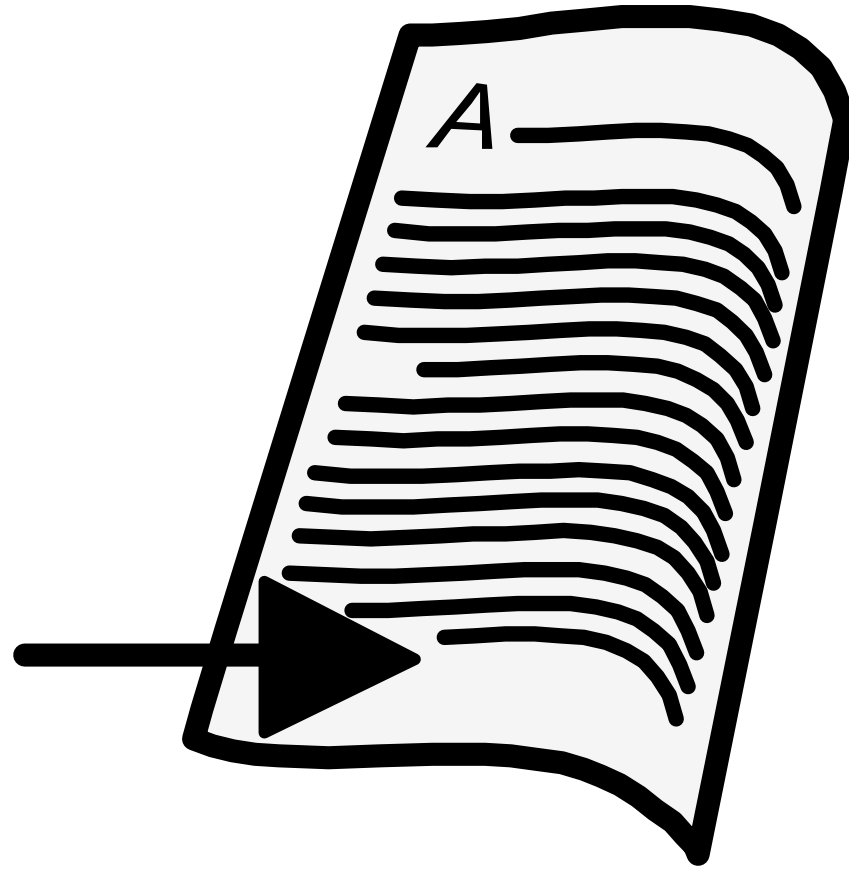

happily

on

earth

the end
